

Storm Assist Organization Overview

Who We Are:

Storm Assist is a collaborative effort by storm chasers to provide aid to communities directly impacted by damaging weather events. We are a 100% volunteer organization that strives to give back to the same towns we see damaged by tornadoes, hurricanes, and other weather phenomenon around United States. Veteran and new storm chasers alike are encouraged to give back through Storm Assist's mission of helping the victims of natural disasters. Through this, we are a collective group of individuals that love to help the less fortunate in times of need.

Mission:

Storm Assist's mission is to raise funds for disaster relief through the sale of DVDs, calendars, and other merchandise created by storm chasers for Storm Assist's charitable purposes. Profits from sales will go directly to local, charitable organizations and communities that have been devastated by these events. To accomplish this goal we compile the best of the best in awe-inspiring and beautiful storm footage/photos donated by storm chasers around the world to create exciting offerings each year. Storm Assist hopes to cover and provide aid for future severe weather events on an annual basis. This is our way of giving back.

Our Philosophy:

Storm Assist is dedicated to being a grassroots movement with a "100%" mentality. All the team members are 100% donating their time, efforts, skills and talent. We are currently in the second year of our organization and will continue building our efforts as we move into further years. In addition, it is of the utmost importance to us that we be transparent in our financials and post financial information publicly as soon as it is organized in a presentable manner. 100% of the profits minus taxes and operating costs will be donated to charitable causes.

In our hearts, we wish to make the greatest impact possible on a local level. Because of that, we are acting with an immediate response donation approach, finding a charitable organization local to the impacts of severe weather through the year. If no local charities can be determined, we will be donating instead to the nearest local chapter of the Red Cross.

How You Can Help:

Storm chasers of all backgrounds are encouraged to contribute their storm video, photographs, and skills. We also are always open to individuals willing to join our support team and donate time, talent or energy to our organization. Please get in touch at info@stormassist.org if you would like to help.
